DocuSign Connector for iManage Work Business Benefits

Ensure security and validity Any recipient of a document digitally signed with the DocuSign Connector can easily verify the signature.

Implement paperless signature approvals Skip the process of having to print documents only to sign and scan them back in. Go paperless without drastic changes to existing processes.

Increase efficiency Integrate signing tasks directly into FileSite and DeskSite, reducing task times by completely eliminating the "print-sign-scan" process.

Improve compliance Documents signed using DocuSign comply with the most stringent international, national and industry regulations for electronic signatures.

Key Features

- Functionality accessible through the right click context menus within FileSite & DeskSite.

- Signed documents automatically saved back into iManage as a new version or new document when signing is completed by all parties.

- When your document is signed through the connector, audit messages are written to the iManage Work document activity log, indicating signing activity.

- The document signing certification is also stored in iManage Work along with DocuSign envelope histories to assist with compliance procedures.
