

Agenda

Briefing Frontiers – Information security, privacy and protection

5 July 2018
Pinsent Masons, London

8.55

Chair's opening address –

Kayli Olson, assistant editor, Briefing

9.00

Cybersecurity in the legal sector: What to expect in 2018 and beyond

- What is the current threat landscape?
- What threats are targeted at law firms and their people?
- Real life examples of security issues facing our clients, and the steps they are taking to overcome them

Mike McLellan, senior security researcher, Secureworks

9.30

Cyber hygiene – doing the basics

- Data hygiene and the unsexy things firms must do to stay in shape
- Why subcontractors, temporary staff and even your clients are high risk points for infection
- The risks associated with a flat infrastructure with potentially little differentiation of high- and low-value assets
- Realistic infosec challenges associated with BYOD and appropriate responses to these
- Why humans are always vulnerable, and it is vital that as much responsibility as possible is taken away from the user

Stuart Aston, national security officer, Microsoft UK

10.00

Panel – the danger of the status quo

- To what extent are staff across firms cyber aware?
- Why success can only come from planning for failure – how to build the risk of failure into the design process
- The need for board-level/senior partner leadership on infosecurity
- Is cyber-assurance a realistic USP for firms or is it simply 'expected'?
- How can firms differentiate themselves based on cyber-reputation when most breaches are kept out of the public eye?

Moderator: Kayli Olson, assistant editor, Briefing

Christian Toon, chief information security officer, Pinsent Masons

Chris Gunner, global IT security manager, Clyde & Co

Howard McKay, senior lawyer, BT Legal

Stuart Ritchie, director, GDPR360

10.35

Disrupting the way cybersecurity services are procured and delivered

- Throwing out the rule book
- Can cybersecurity add value to the legal services portfolio?
- How to align your cybersecurity strategy to match up with your business needs

James McDowell, director, BlackBerry Cybersecurity Consulting

11.05

Coffee and networking

11.35

One step ahead of uncertainty – GDPR and the supplier IT risk landscape

In this session we will discuss the practical aspects of GDPR and third-party risk management and what opportunities a law firm like yours has to ensure an effective, efficient and robust level of scrutiny is applied throughout your data supply chain.

- Nth Party Management: right to audit supply chain and how far to go
- Understanding expectations post-implementation of GDPR and ongoing assessment of third parties
- Best practices and collaboration – what are the key drivers of standardisation and best practice?
- What does collaboration in TPRA look like?

Sean O'Brien, managing director, DVV Solutions

12.05

Interactive session

Delegates will break into groups to discuss the themes developed during the morning and share insights into how they are overcoming the cyber challenges they are facing in their role. Following the session, key findings will be shared with the group

Led by: Christian Toon, chief information security officer, Pinsent Masons

12.35

Close of conference, coffee and chat
