

iTAG (Test Advancement Guide)

Purpose: To assess your current testing practices and provide a recommended model of working that looks at the business drivers, time and finances available. This is a rapid assessment of current capabilities, and provides a clearly articulated approach for your organisation tailored to your specific needs with iJET(Just Enough Testing) principles applied, supported by 3 training sessions of your choice. The output is a rapid advancement of your testing maturity and capability, focused on your areas of risk and pain. This is a 5-day engagement suitable for small or medium (SME) firms, with concerns around quality and change. Low cost and high impact!

Day	Scope	Location
1	<ul style="list-style-type: none"> • Organisation structure explained with expanded view of IT • Current methods of testing explained • Identification of stakeholders, contributors, supporters and users 	Client
2	<ul style="list-style-type: none"> • Focused exploratory sessions with up to 5 people of your choice. 1 to 1.5 hours each. • IDS - Training Session 1 (1 hour) 	Client
3	<ul style="list-style-type: none"> • 3 Project Reviews 1.5 to 2 hours each. <ul style="list-style-type: none"> • Discuss the concept of the project and the goals. • Explain the ROI that is expected. • Discuss how the project is being delivered/who is delivering. • Explain how the project is integrating with the wider IT estate. • Explain the current approach to testing. • Training Session 2 (1 hour) • Test Challenge – After-hours testing session, looking at testing using different methods. A real-world example, to be provided by the client. (2 to 3 hours informal offsite. Client may want to provide refreshments.) 	Client
4	<ul style="list-style-type: none"> • Review of findings • Creation of Test Advancement Guide • Quick Wins Guide • iJET approaches for 3 Projects Reviewed 	Offsite
5	<ul style="list-style-type: none"> • Training Session 3 (1 hour) • Presentation of findings and recommendations • Question & Answers session • Discussion of next steps 	Client

Training Sessions: Choose 3 training sessions. (1 hour per session)

1. The importance of requirements and making sure they are right.
2. How to work out what to test and structured testing approaches.
3. How to perform testing without scripts.
4. Testing in the Software Development Lifecycle.
5. Bugs – Finding, logging, triage and fixing.
6. An introduction to software testing and the different types.
